EXPERIENCE

Full stack developer – Algerie Telecom

I worked closely with a team of developers on web application development and database management . Key achievements include:

- Development of a **web application** for the management of import-related purchasing processes, using **Laravel**, **Tailwind CSS**, **JavaScript**, **GIT** and **SQL**.
- Participation in database optimization and maintenance.
- Contribution to the implementation of effective solutions for automating certain internal workflows.
- Creating custom visual identities with **Adobe Photoshop**

SIG Service – Dely Ibrahim, Algeria

- Completed a 3-month internship focused on modern web development.
- Worked with **Vue 3**, **TypeScript**, and **REST APIs** to build and improve front-end applications.
- **Refactored** a core project ("E-Kadia"): migrated the codebase from **Vue 2 (JavaScript)** to **Vue 3 (TypeScript)**, improving **maintainability** and **scalability**.
- **Collaborated** with the development team to ensure code quality, best practices, and smooth integration with **backend services**.
- Gained hands-on experience in **frontend frameworks**, **API consumption**, and **project modernization**.

Portfolio web site

A modern, responsive portfolio built with **React** and **Tailwind CSS**, showcasing my front-end development skills, projects, and background. Designed with a focus on performance, **clean UI**, and intuitive **navigation** to highlight creativity and functionality.

Football-app

- Started as a game awards site, then evolved into a **football-focused** web app.
- Built using **Next.js**, **Tailwind CSS**, and **GSAP** for **smooth animations**.
- Designed with a **responsive layout** and interactive user experience.
- Showcases adaptability, front-end development skills, and advanced animation techniques.

To Do List

- Built a **To-Do List** app using **Vue 3**, **TypeScript**, and **Vite**, leveraging the Composition **API**.
- Allows users to **add**, **toggle**, **delete**, and **filter** tasks with real-time task counter.
- Includes form validation to prevent empty entries and improve user experience.
- Structured with modular components for scalability and maintainability:
 - App.vue**: Manages state and core logic.
 - Task.vue**: Input form with validation and event handling.
 - Tasklist.vue**: Renders tasks with toggle and delete features.
 - FilterButton.vue**: Reusable filter controls.

Cyber security expertise

As a Junior **IT professional**, I have hands-on experience with troubleshooting hardware/software issues, system configuration, and network support. I assist with system updates, user support, and maintaining IT infrastructure. Eager to expand my skills in real-world IT environments, I am dedicated to problem-solving and continuous learning

Ongoing Learning

Currently learning to build **AI agents** and automation workflows using **Make.com** to enhance my skills in **no-code** AI integration and process automation.
